No person will be turned out of office unless for some adequate reason—either changes in policy, or some more personal cause. It unfortunately happens, for our credit ubroad, that under this latter head more than one removal is required. It is said that soveral of the parties who have been turned out of office have supplicated Father Ritchis not to mention their cases—being afraid the dot their dismissals. It is a matter well known, that defalcations have been discovered among officials to a great extent. When Congress meets, the information can be called for, and it will, doubties, be promptly furnished. It will then be discovered that some of the worst cases of proscription are those of persons who have dishonestly used the trusts committed to their charge. The "Sorrows of Werter" were not to be compared to the lamentations of the Locofococo of this day, over the loss of the loaves and fishes, which they have been empoying with so much gusto for years past—Only think of the wicksdness of Gen. Tavaou and his eabinet, in taking from "Pather Ritchie," and all the little Ritchies recently removed from office, for just cause, the cream which they have been sucking from Uncle Sam's total during Jacknoi's, Van Buren's, and Polk's administrations. Why, my dear Mr. Editor of the Whig, it is really heart-breaking to think of it, and, therefore, you ought not to be so very severe on our good old friend of the Union for being so cross at losing so fruittial and nourh hing a nipple. \$200,000 clear profit upon the public and prieste printing of Congress and the Departments are not to be sneezed at in the best of times, though a man may catch cold at boing that sum, like leaving off flamel rather and deally, and out of season for health, and cause him to sneeze under the infliction. This is precisely the case with "Father Ritchie," you man. He has caught a severe cold from having been too suddenly stripped of the parronage of power, and is consequently compelled to blow rather loud through his nasil organ—the Union. Whether he ever expects to be courf of the discount on the kind indugence of those who are fortunate enough not to be afflicted in the same way. Do 1848 41,550 Total The near approach of the cholera to this city has caused a good deal of aiarm to be manifested by the local press, but beyond that we can discover no sign of easy preparation for the deadly visiter. Washington possesses more natural advantage for the preservation of health than almost any city in the Union, and yet a more filthy hole it would be difficult to find anywhere. Garbage and fifth of all kinds is sillowed to rot in the streets; sewers there are none; our houses are horrible; and, altogether, the effluvia which perveden the air is cought to breed any discusse which can flourish in the midst of dirt. It is to be hoped the city a unborties will exert themselves before it is too late, and make the inhabitants keep their houses and yards clean. Their present state is diagnorful.
